

RJ Safety Services
Welcomes you!

Vision and Mission

Our vision is to provide a happy and reliable service for safety, quality, environmental protection and profitability. By providing these services, RJSS delivers competitive edge to its clients globally.

Our Mission is to use our passion about technology and apply it to the possibilities of your business. We believe that safe work should better people's lives. We work with our clients to optimize their operations and empower them to access global markets and enhance their competitiveness.

- RJSS was founded in 2005 as a safety inspection and audit organisation.
- Over the years the gamut of activities has grown to encompass a broad range of activities and services.
- It has also grown in geographical terms to now provide services globally.

Services – 1

RJSS provides a comprehensive range of services, related to Health, Safety & Environment. They are:

- A bank of readily deployable safety professionals, at all levels
- Safety Audits – Specific and Comprehensive
- Safety systems implementation
- Training – Safety and Behavioural (HR)

- Supply of safety equipment and material
- Safety system design and documentation
- Ambulance services
- Any and every other service related to safety

RJSS provides a comprehensive range of services, related to Civil construction. They are:

- A bank of readily deployable Civil, Electrical, P&M, Plumbing professionals, at all levels.
- We provide pre-delivery quality related snag-list for flats and under construction projects.
- This is followed by a de-snag confirmation after the snags have been addressed.
- This ensures that what is delivered to your customers, is perfect!

Construction Quality Assurance

Safety Professional

- Good Safety professionals are not easy to come by.
- RJSS provides a bank of readily deployable safety professionals, at all levels.
- These are available on a need to deploy basis.
- This helps you reduce costs of your projects, by reducing overheads and supervisory costs.

Manpower

- Currently 75 employees are working in RJ Safety Service in Pune.
- We provide staff from Safety Manager to Safety Supervisor Level
- Out of 75 employees 60 employees have B.E. (Mech) + Advance Diploma in industrial Safety (ADIS) Degree
- We provide highly skilled and experienced staff for projects.

Safety Audits

- Not all activities happen continuously. This requires specific audits, e.g. excavation...
- Some activities are continuous and need a continuous safety work, e.g. electric safety .
- Fire safety Audit (Hospital, Mall, School, Collage, residential commercial property,
- If your requirement is short term and you don't need a safety department, RJSS can provide you a comprehensive solution.
- You can pick and choose what you want.

Safety System Implementation

Implementation of safety measures is a tricky matter and needs a broad based experience to be implemented on a turnkey basis

It involves:

- Systems – covering all aspects of safety
- Documentation of all aspects
- Action on ground is the key to success
- Audit – ensuring that intent is converted to action
- Compliance to the satisfaction of authorities

Training – Safety and Behavior

- Theory and practical training modules for all aspects of safety
- Soft skills training for all levels of organisation
- Behavioural and attitudinal training at all levels from workers to Directors

Safety system design and documentation

We help you to set up everything, if you are new.

This includes:

- Safety policy
- Safety manual
- Various internal permits
- Various safety processes and plans
- Safety related legal compliances

Ambulance Services

- Ambulance services with trained driver

Hassle Free Safety

What is Safety?

- Safety is a concept that includes all measures and practices taken to preserve the life, health, and bodily integrity of individuals.

What does it involve?

- Systems
- Behaviour & Training
- Safe Equipment
- Legal Compliances
- Monitoring & Audits
- Continuous Improvement

- Policy
- Manual
- Documents
- Procedures
- Control /
Monitoring
- Analysing the root
causes

Training

- Human behaviour is the most critical component in ensuring safety in any workplace. So, it is important that everyone understands:
- Safe behaviour
- Safe practices
- Theory and practical of all aspects of safety

Safe Equipment

- Many a times in the pursuit of productivity and deadlines, there is a human tendency to bypass safety. This requires fool proof systems and equipment. The cost is a human life or lifetime impairment.
- Many Indian equipment don't come with safety measures that are built in.
- We need, retrofitted safety measures

Legal Compliances

- Recording of incidents
- Compiling of records
- Maintaining records
- Ensuring preparedness
- Submitting to statutory authorities

- All systems need periodic audit to ensure compliance. That is the first objective.
- A well maintained system helps learning. Periodic audit helps to analyse and build up on this learning
- Third party audit is mandatory in certain cases

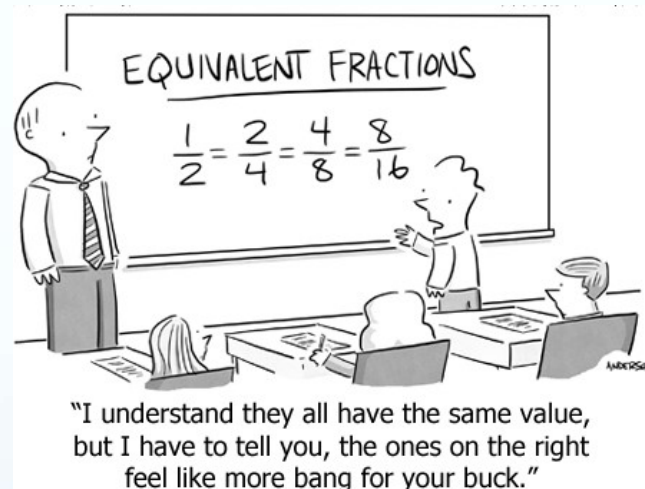

Continuous Improvement

- Nothing worthwhile is ever achieved in a single magical step. It needs sustained effort and learning. The sources are:
- Self analysis and study of own systems, documents and reports
- Laws and legal requirements
- Practices by professional bodies like OSHAS
- Benchmarking from Peers and the industry

Does Safety Cost Much?

- Surprisingly safety does not cost much.
- As a matter of fact, safety is a good insurance investment, what with the laws in place

There are ways and means to get the most bang for your buck!

- The RJSS offers the services of a large number of experts with a large amount of experience and knowledge.
- They are available on a need to deploy basis in terms of days on call, rather than months on roll.
- This makes their services affordable, without compromising on the quality
